

I am Denise Koutrouba, Women Veteran Program Manager, and Women Health Nurse Practitioner at VA Pacific Island Health Care System. I served in the Army Nurse Corps for 23 ½ years with 2 Deployments. My passion has been caring for women in all lifespans, and was able to do this in the military and now women Veterans. I have been very fortunate to work for the VA, and have a supportive leadership who has the same passion for growth and development of new programs for our women who served. Women Health Services, Under the Secretary of the VHA, works hard to ensure all women Veterans receive the highest quality of comprehensive health care. As the women Veteran advocate, I am here to answer any questions, provide referrals, and ensure we meet the needs of our women Veteran population.
